

GrowUp™ is a specialized microbial soil and foliar additive formulated to optimize turfgrass growth, enhance plant resilience, and support long-term soil health. Designed for professional turf applications, GrowUp delivers measurable agronomic benefits while reducing reliance on synthetic inputs.

GrowUp™ is designed for residential and professional turf management systems alike, including golf courses & sports fields, residential and commercial landscaping & lawn care as well as municipal & institutional grounds.

WHY USE GROWUP?

IMPROVED TURF QUALITY

Promotes uniform, dense, and vibrant grass stands.

REDUCED INPUTS

Lower dependence on synthetic fertilizers while maintaining results.

SUSTAINABLE SOIL HEALTH

Rebuilds microbial activity for long-term fertility.

STRONGER RESILIENCE

Helps turf withstand drought, frost, and environmental stressors.

RESIDENTIAL & COMMERCIAL APPLICATION
